

Copyrights are the exclusive rights of a persons to publish and reproduce any piece of work, like texts, pictures, videos, artwork and so on. This means that if you want to use materials in videos which are copyrighted, you need permission of the creator to use it. This is normally accompanied by payment of the author. Luckily there are also materials online which are not protected by copyrights and which you can use in your video: materials with the creative common license.

1 Creative commons

Creative Commons (cc) licenses are free of charge licenses that allow creators to communicate which rights they reserve, and which rights they waive for the benefit of recipients or other creators. Visit this the [creative commons](https://creativecommons.org/) website to see some examples of the creative commons license. There are four conditions under which the author can license his or her work:

ATTRIBUTION

Others can copy, distribute, perform and remix your work if they credit your name as requested by you.

BY

NO DERIVATIVE WORKS

Others can only copy, distribute, display or perform verbatim copies of your work.

SHARE ALIKE

Others can distribute your work only under a license identical to the one you have chosen for your work.

SA

NON COMMERCIAL

Others can copy, distribute display, perform and remix your work but for non-commercial purposes only.

2 Where to find creative commons content?

It is not hard to find materials under the creative common license, but you need to know where to start. A good starting point is the website is: <http://search.creativecommons.org>. This is a search engine which searches through google images, YouTube, Flickr, Wikipedia and other websites for creative commons materials.

Other websites for creative commons materials:

Photos: <http://www.freefoto.com>
<http://stockmedia.cc>
<https://commons.wikimedia.org>
<http://www.unsplash.com>

Videos: <http://www.videezy.com>

Music: <http://www.freemusicarchive.org>
<https://creativecommons.org/music-communities>

3 How to attribute content?

To attribute works that you reuse under a Creative Commons license you generally must at least include:

1. The title
2. Name of author and
3. The specific license the work is under

EXAMPLES OF ATTRIBUTING:

Ryan Chouest – Offshore workboat by gcaptain.com / CC BY

Star by Tom Hall / CC BY

Photo by Wikipedia / CC BY SA

4 Licensing your own video

When you have created a video yourself, it's wise to choose a CC license so others will only use it in a way that you agree with. TU Delft recommends to use CC BY-NC-SA which lets others remix, tweak, and build upon your work non-commercially, as long as they credit you and license their new creations under the identical terms. You can download the creative common icons from this site: <https://creativecommons.org/about/downloads/>.
